

Oak Green School Curriculum Newsletter

Year 1

Summer 2, 2025

Maths: In maths this term we have been learning about money and time. We have been learning about coins and notes. We have learnt how they have different values and how we can use them in different ways to make up total amounts. We have been using mathematical language to describe chronological order and learning about the hour and minute hand on an analogue clock.

Science: Our focus in science this term has been seasonal changes. Using our observation skills, we have recorded, discussed and compared the changes we have noticed during all 4 seasons. We have had lots of outdoor learning opportunities to observe and identify patterns in the weather. This knowledge has helped us connect our learning to understand how the weather is linked to the seasons.

History: In history this term we have been learning about the Victorians. We have looked at what life was like for a Victorian child and the similarities and differences between going to school now and then. We really enjoyed our trip to the museum where we got to sit in a Victorian classroom and learnt that the teachers were very strict!
