

# Oak Green School Curriculum Newsletter

Year 3

Spring 1 2026

In maths, the children have enjoyed practicing measuring with rulers. We have learnt how to measure in centimetres, millimetres and metres. We then used this knowledge to practice measuring and calculating the perimeter of different shapes.

In RE, the children have learned about Christianity. This term, the children learned how important miracles are in the Bible. They learned about various miracles performed by Jesus. We then had a go at writing newspaper articles telling the miracle of when Jesus healed a paralysed man.

In art, the children learnt about ammonites - the remains of animals which lived millions of years ago. We had a wonderful time creating prints of ammonite designs. We even then had the chance to make our own ammonite out of clay!
