

Oak Green School Curriculum Newsletter  
Year 5  
Spring 1, 2026

This half term we had a visit from Science Oxford with their amazing planetarium. We observed the night sky, learnt about constellations and even visited some of the planets! We learnt about sunrise and sunset and how they change with the seasons.

In geography, our topic has been sow, grow and farm. We have learnt about the impact of farming on different countries and the impact of climate on different types of farming, for example, coffee and potato farming.

In art, we have explored lines, light and shadows. We have sketched various animals and objects using different techniques such as scribbling, stippling, contouring, cross hatching and blending.
