

Oak Green School Curriculum Newsletter

Year 5

Autumn 2, 2025

On 7th November, we celebrated Outdoor Learning Day. We did an orienteering task on the field.

Back in the classroom, we created a picture of the solar system using natural materials.

In DT this half-term, we have been creating pneumatic systems including making our own toys. Pneumatic devices use the power of compressed air. When the compressed air or gas is released, it rushes out and pushes the machine's parts, making them move.

In science, we have been studying Earth and Space. We have been drawing and labelling diagrams of the solar system and finding out facts about the planets.
