

Little Owls and Eagle Owls Summer Activity Ideas

This term our topics are based around our world. Why not try some of the following activities at home with your family...

- * Plant some seeds at home and watch them grow.
- Make a suncatcher using recyclable plastic found at home.
- When playing outside, look at your shadow. Is it as big as you or smaller?
- Can you use crayons and some paper to make nature rubbings?

Summertime

We will also be learning about the change of seasons from Spring to Summer this term. Why not try some of these conversation starters and activities...

Plants and trees may grow flowers and fruits. Can you plant and look after your sunflower seed at home? What does it need to grow? How tall is it now?

Do you have or can you see plants and trees from your house? How many different flowers do you see when you walk to school or go to the park?

Some children will be moving classes over the summer break and we will be talking about journeys and holidays. How do you get there? Go for a walk and count how many cars you can see? Are any of the cars the same colour? What do you need to pack if you are going away? Why?
